

Amazon AWS

AWS Cli tools

- install AWS CLI version 2 by following this web page

<https://docs.aws.amazon.com/cli/latest/userguide/install-cliv2.html>

AWS S3 commands

Reference: <https://aws.amazon.com/premiumsupport/knowledge-center/s3-locate-credentials-error/>

- After installation, test the AWS commands
- list the buckets

```
# aws s3 ls
```

- if the above command fail, it is because you have not configure the credentials yet
- check your credentials

```
# aws configure list
```

```
donlee@desktop-p27sreq apao2021 % aws configure list
  Name                               Value                               Type    Location
  ----                               -
  profile                            <not set>                          None     None
  access_key                         <not set>                          None     None
  secret_key                         <not set>                          None     None
  region                             <not set>                          None     None
```

- run the following command and enter the Access key and secret.

```
# aws configure
```

- Enter the AWS Access Key ID and AWS Secret Access Key and leave other blank
 - AWS Access Key ID: ask your administrator
 - AWS Secret Access Key: ask your administrator
 - Default region name: Leave blank and Enter
 - Default output format: Leave blank and Enter

```
donlee@desktop-p27sreq apao2021 % aws configure
AWS Access Key ID [None]: AKIARIYVMV
AWS Secret Access Key [None]: XanD94
Default region name [None]:
Default output format [None]:
donlee@desktop-p27sreq apao2021 %
```

- check your credentials again to see if it is success

```
# aws configure list
```

```
donlee@desktop-p27sreq apao2021 % aws configure list
      Name                               Value                               Type    Location
-----
profile                                <not set>                           None     None
access_key                            *****3H77                         shared-credentials-file
secret_key                             *****wK/q                         shared-credentials-file
region                                <not set>                           None     None
donlee@desktop-p27sreq apao2021 %
```

- Now, try list all bucket again

```
# aws s3 ls
```

AWS S3 commands

- sync desired bucket by this command
- create an empty folder e.g. localpath
- remember to put *s3:bucket in front of your localpath* `<code> # mkdir ~/localpath # aws s3 sync s3:bucketname ~/localpath`

</code>

- example

```
# cd ~/Downloads/apao2021
# aws s3 sync s3://apao2021 .
```
