

Dokuwiki Two Factor Authentication

Download and install the Microsoft Authenticator app on your mobile phone before you proceed.

In this guide, whenever it mentions the Google Authenticator app, use Microsoft Authenticator app instead as it is better.

First-time Login

- There will be a “Two Factor Authentication Token” box in the login screen.

Log In

Username

Password

Two Factor Authentication Token
(leave blank if not using)

☐ Remember me

Forgotten your password? Get a new one: [Set new password](#)

- Just login with username and password, leave “Two Factor Authentication Token” blank.
- It will then re-direct to a page to ask you to enable “Two Factor Authentication”.

Email

☐ Use the email registered with this wiki to receive codes

Google Authenticator

☒ Create Google Authenticator QR Code

Confirm your password

Confirm current password

[Return to content](#)

- You MUST choose the option “Create Google Authenticator QR Code”
 - (optional) you could also choose the “Use the email registered...” option as a backup.
- Enter your login password in “Confirm current password” AGAIN.
- Click [Save]

Email

☐ Use the email registered with this wiki to receive codes

Google Authenticator

Scan with Google Authenticator

You need to verify that Google Authenticator is working before you can use it to login.

Enter code from Google Authenticator

☐ Revoke Google Authenticator

Confirm your password

Confirm current password

[Return to content](#)

- Now open your Microsoft Authenticator app to scan the QR code and then input the code in “Enter code from Google Authenticator”.
 - (optional) If you have enable “Use the email registered...”, you could also check your

email to get the verification code.

- Enter your login password in “Confirm current password” AGAIN.
- Click [Save]
- Now, you should login to the Questwork Wiki successfully. Just click the Questwork logo on top-left and start browsing.

Login

- Next time, when you login, depends on your two factor settings.

Microsoft Authenticator

- login with your username, password
- get the code from your Microsoft Authenticator app and input the code in “Two Factor Authentication Token” box

The screenshot shows a login form titled "Log In". It contains three input fields: "Username" with the value "user", "Password" with masked characters "*****", and "Two Factor Authentication Token" with the value "123456". Below the token field is a checkbox labeled "Remember me" which is unchecked. A green "Log In" button is positioned below the checkbox. At the bottom of the form, there is a link: "Forgotten your password? Get a new one: [Set new password](#)".
