Step by Step

- Download and install 'Microsoft Authenticator' on your mobile phone.
- Login your Office 365
- click [View Account] on top-right
- choose [Security Info] on the left menu bar
- click [Add method]
- choose 'Authenticator app'

- click next a few times until you see the QR code
- scan with the microsoft authenitcator app and then click next
- it will then ask you to 'approve' it on your mobile phone

- there should be 'microsoft authenticator' in the list. Click the [change] button to change the 'default sign-in method' to 'Microsoft authenticator'
- Then try logout and login again, after you enter the password, it should ask you to approve it on your mobile phone
