Workflow of Coding

- Confirm with Billy or Don on tasks
- **Estimate** the required time
- **Discuss how** would you do the tasks
- git PULL to get the latest code from git server
- Update the tasks to a update.txt file in the project. (Include Date, Coder Name and tasks)
- **Add comment** to the modified code (as much as possible)
- Test run the modified code
- Commit and git **PUSH** only the program is working fine
- Billy will check and review the git everyday
- Billy will update the project site Questwork Internal website
