Integrate SendGrid

Reference

- SendGrid

Step

- Add a new Single Sender
- Add a new API Keys
- Read Send API
- Stringify html content, reference Use dart to write a text converter app
- Use postman to test

```
POST https://api.sendgrid.com/v3/mail/send

request headers
{
  Authorization: Bearer <API Key>
}

request body
{
    "personalizations": [
        {
            "to": [
                {
                    "email": "clutchjoe@outlook.com"
                }
            ]
        }
    ],
    "from": {
        "email": "joe.mao@gz.questwork.com"
    },
    "subject": "Vue.js前端笔试题",
    "content": [
        {
            "type": "text/html",

        }
    ],
    // for SendGrid filtering
    "categories": ["Frontend"],
    // schedule mail time
    "send_at": 1667197082
}
```

If you need to test sending emails later, you can also use postman to perform an http network request as above.

Check Schedule emails form SendGrid

- Open SendGrid Activity panel, Link
