

Amazon AWS

AWS Cli tools Installation

Reference: <https://docs.aws.amazon.com/cli/latest/userguide/install-cliv2.html>

- install AWS CLI version 2

AWS S3 commands

- After installation, test the AWS commands
- check your credentials

```
# aws configure list
```

```
donlee@desktop-p27sreq apao2021 % aws configure list
  Name                               Value                Type    Location
  ---                               -
  profile                             <not set>            None    None
  access_key                           <not set>            None    None
  secret_key                           <not set>            None    None
  region                               <not set>            None    None
```

- run the following command and enter the Access key and secret.

```
# aws configure
```

- Enter the AWS Access Key ID and AWS Secret Access Key and leave other blank
 - AWS Access Key ID: ask your administrator
 - AWS Secret Access Key: ask your administrator
 - Default region name: Leave blank and Enter
 - Default output format: Leave blank and Enter

```
donlee@desktop-p27sreq apao2021 % aws configure
AWS Access Key ID [None]: AKIARIYVMVt
AWS Secret Access Key [None]: XanD94t
Default region name [None]:
Default output format [None]:
donlee@desktop-p27sreq apao2021 %
```

- check your credentials again to see if it is success

```
# aws configure list
```

```
donlee@desktop-p27sreq apao2021 % aws configure list
  Name                               Value                Type    Location
  ---                               -
  profile                             <not set>            None    None
  access_key   *****3H77  shared-credentials-file
  secret_key   *****wK/q  shared-credentials-file
  region       <not set>            None    None
donlee@desktop-p27sreq apao2021 %
```

AWS S3 Sync commands

Reference:

<https://docs.aws.amazon.com/cli/latest/userguide/cli-services-s3-commands.html#using-s3-command-s-managing-objects-sync>

- sync desired bucket by AWS S3 Sync command

```
# aws s3 sync source target
```

- sync all files from a bucket to your local folder
 - create an empty folder e.g. apao2021
 - remember to put the source (s3 bucket) before your target (local folder)

```
# mkdir apao2021
# cd apao2021
# aws s3 sync s3://apao2021 .
```

- By default, the sync command will **DOWNLOAD** all newly uploaded files to your local folder when you run it. So, you may run it regularly to download new file, if any.

```
# cd apao2021
# aws s3 sync s3://apao2021 .
```
