为了方便管理设置，可以在Download>Categorioes中添加文件类别对文件进行分类

**Add New Category**

Name:

The name is how it appears on your site.

Slug:

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category:

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description:

The description is not prominent by default; however, some themes may show it.
