

Groups

Reference: <https://wordpress.org/plugins/groups/>

- Groups插件可以限制不同用户对帖子，页面，产品等部分内容信息的访问

如何使用groups限制对部分内容信息的访问

- 1. 添加一个新的组 [Dashboard]>Groups>New Group

- 输入Name [选择需要的Capabilities (可以多选)]，添加。
- 2. 将用户分配给组，分类用户 [Dashboard]>账号>all Users]

注意:勾选用户，点击Choose groups选择好对应的group之后，要选择Add to

- 3. 将内容选为特定组才可访问

例1:限制某一篇post的访问，通过Dashboard>post>Groups

A screenshot of a WordPress post editor. In the visual composer area, there is a box containing the shortcode [groups_member group="Registered"] [/groups_member]. This shortcode is used to restrict the content within the box to users in the 'Registered' group.

例2:限制页面部分内容的访问，在edit page里面，直接给需要限制的内容加上短代码

```
groups_member group="Registered"]
[/groups_member]
```

其中[group="Registered"]中的Registered为可以访问的Groups Name[]可修改为其余组名。如

SiteOrigin Editor

Title

新增媒體

```
[groups_member group ="vvip"]
[wpdm_package id='185']
[/groups_member]
```
