

How to display news Excerpts

显示news的摘要需要用到两个plugins，分别是List category posts和 Rich Text Excerpts。它们的功能分别是：控制显示news的数量和控制每一条news的摘要的字数。

Rich Text Excerpts

- 安装好Rich Text Excerpts这个plugin之后post的编辑页面会多了一个写“Excerpt”的地方
- 1. dashboard>postos>add new

- 2. 按照要求填写好post title，此处对应的时候news的标题
- 3. 写入news的内容
- 4. 在excerpt区域内写入摘要

The screenshot shows a WordPress editor interface. At the top, there's a toolbar with various buttons like bold, italic, link, b-quote, del, ins, img, ul, ol, li, code, more, and close tags. Below the toolbar, the word "Excerpt" is displayed. At the top right of the editor area, there are two tabs: "Visual" and "Text". The "Text" tab is highlighted with a red box around it. To the right of the editor area, there are some small icons for font size, alignment, and other settings.

```
<div style="color: #868686">26 October 2018</div>
<div style="color: #868686"></div>
```

在“Text”形式下可以加入一些html代码来控制摘要字体的颜色，大小等等

List category posts

- List category posts是使用[catlist]短代码在帖子或页面中按类别列出帖子，当编辑页面或帖子时，直接在“Text”中插入短代码，帖子将在那里列出。

The screenshot shows the SiteOrigin Editor interface again. At the top, there's a title field containing "Recent News" and a toolbar with "Add Media" and "Insert Icon" buttons. Below the toolbar, the "Text" tab is selected. The main editor area contains the following code:

```
<div class="section-header3">Recent News</div>
<div>&nbsp;</div>
[catlist name="recent-news" excerpt=full]
```

- 基本用法是这样的：

```
[catlist id=1]
```

```
[catlist name="news"]
```

The screenshot shows a WYSIWYG editor interface with a toolbar at the top. The toolbar includes buttons for Add Media, Insert Icon, and a switch between Visual and Text modes. Below the toolbar, there are several buttons for text styling (b, i, link) and other editing functions (b-quote, del, ins, img, ul, ol, li, code, more, close tags, Smart Slider). The main area contains some HTML code:

```
<div class="section-header3">Recent News</div>
<div>&nbsp;</div>
[catlist name="recent-news" excerpt=full]
```

- 要显示每个帖子的摘录使用 `[catlist excerpt = yes]`
- 列出“Dogs”类别的帖子 `[catlist name = Dogs]`
