

Git

Install [Git](#) and [SmartGit](#)

It is recommended to use File Manager (Working Tree) as the main window style for SmartGit. You can choose this during the installation, or you may change this setting in Preferences > User Interface.

Remember to copy and rename your Public Key `id_rsa.pub` to your `firstname.lastname.pub` (e.g. `david.ma.pub`) and email it to us at `developer@questwork.com`.
