Setting Up Flutter Develop Machine

Setting up

Visual Studio Code setup

Git

Flutter

Android studio

xcode

Building the app

- Get the correct branch from SmartGit (you may create a new branch from here)
- Download the corresponding Google Play upload key from Android App Keystore
- Place the .jks in a folder such as '~/keystore/'
- Create a file in project folder/android/ called key.properties and write in the file

storePassword=<password>
keyPassword=<password>
keyAlias=key
storeFile=<file path to .jsk file>

• In Visual Studio Code, choose the device you will run the code and start debugging by pressing Run > Start Debugging or pressing F5
