

# Xcode

Install Xcode at [Mac App Store](#)

Configure Xcode command-line tools by running the following from the command line

```
sudo xcode-select --switch /Applications/Xcode.app/Contents/Developer
sudo xcodebuild -runFirstLaunch
```

Make sure the Xcode license agreement is signed by either opening Xcode once and confirming or running `sudo xcodebuild -license` from the command line.

## Accounts

Set up the ios developer account in Xcode to set up the signing of the app.

At a Macbook that is signed into the `iosdev@questwork.com` apple developer account.

- Go to Xcode and choose Preferences > Accounts
- Choose the `iosdev@questwork.com` account and click on the gear icon at the bottom of the accounts list
- Choose Export Apple ID and Code Signing Assets
- Give the file a password and save the `.developerprofile` file

Send the `.developerprofile` file to the Macbook to set up the account

- Go to Xcode and choose Preferences > Accounts
- Click on the gear icon at the bottom of the accounts list
- Choose Import Apple ID and Code Signing Assets
- Choose the `.developerprofile` file and type the password to import the account
