Services Provided by Questwork

- MediKAre Clinic Management System
- MediNote iPad App
- Patient Record Scanning Solution

MediKAre CMS

> 💡 MediKAre is a Clinic Management System designed for private clinic to manage their daily operation.

Features:

- single patient master to store all patient's related information, such as booking history, consultation history, prescription history, sales history, vital signs, medical certificates, etc.
- Search patient by name, patient ID, tel, HKID.
- Support multilingual for patient documents.

MediNote iPad App

> 💡 MediNote iPad App is specific designed for doctor to write or draw notes during consultation. All records will be saved in the patient record in MediKAre CMS.

Features:

- doctor login with same MediKAre CMS credentials.
- Works with Apple Pencil to increase the writing/drawing experience.
- Could annotate previous files/images.
- review previous written or scanned patient records.
- auto display today's booking
- search patient by name or patient ID

Patient Record Scanning Solution

The Patient Record Scanning Solution is designed for clinic to digitize the old paper patient records. All scanned files will be stored in MediKAre CMS for review.

Benefits:

- Much faster to find patient record via MediKAre CMS or MediNote iPad App.
- Save storage space and no worry of deterioration.

Features:

- search patient records by patient ID and then display patient name for double check.
- Could specific date of visit, document type when scanning, so the scanned files could preserve the date order.
- Allow user to see the scanned thumbnail image.
